Shared pipeline recorded once per realization:
transmit_seconds: 34.74 ms/channel; ce_seconds: 2996 ms/channel; native_equalizer_app_seconds: 29.38 ms/channel; native_decode_seconds: 12.26 ms/channel; frontend_seconds: 10.39 ms/channel; ep_seconds: 99.32 ms/channel; feature_seconds: 11.83 ms/channel; ep_decode_seconds: 12.26 ms/channel

Added scale and decoder times exclude shared PHY/CE/EP/frontend/features; not a full-receiver speedup claim.
